## FALL AND WINTER COVID-19 OUTDOOR DINING TIPS

- **Patio heaters can maximize your outdoor space and keep guest comfortable on chilly nights and cold days.** Make sure your patio heaters or other heating devices are safe and meet your local operational guidelines.
- **Replace metal outdoor furniture with tables and chairs made from materials that feel warmer to the touch.**
- **Adding greenery and shrubbery to not only help provide physical distance between tables but to also serve as a shield from wind whipping in.**
- **Thoroughly sanitize tables and chairs between uses to keep guests protected** from the transmittal of germs between parties.
- **Create a casual environment with lounge-style patio furniture and an outdoor firepit.**
- **Use temporary outdoor structures to keep guests warm and dry.** Some areas require a special permit, so be sure to check with your governing Department of Buildings (DOB).
